Soothe and smooth

Sensitive Facial Oil by Natural Elements is a new, non-allergen naturaceutical formula, combining scientific research with natural and organic ingredients for effective anti-ageing results.

Based on enriched oils loaded with vitamins and omegas, the oil not only offers free radical-scavenging capacity, it is in a form which is uninterrupted by synthetic chemicals – thus allowing it to protect cells from the ageing process. The sophisticated, scientifically-based anti-ageing formula reinforces the hydro lipid film which is often compromised by chemicals designed to break down fatty molecules such as wipes, shower gels and shampoos. It also offers UVA and UVB protection and contains ultra-potent antioxidants to neutralise super-charged free radicals. Skin is left smoothed, hydrated and renewed.

Express yourself in HD

HD Brows has launched the Express HD Brows treatment – a 15-minute version of the full HD Brows treatment – allowing time-restricted clients to enjoy the service they have come to know and love, without the time commitment.

This 15-minute appointment is a pick-me-up for brows and is aimed towards busy clients or male clients looking for a quick tidy up, rather than the full HD Brows treatment. "We hope this will answer an increasing client demand for quicker services, while encouraging clients who haven't tried the service before to visit their nearest salon for a quick fix, before embarking on the full HD Brows experience in the future," comments CEO and Founder of HD Brows, Nilam Holmes-Patel.
