ORGANIC SKINCARE

Today it is estimated that an unprecedented 21 million people in the UK suffer with a skin problem. In fact, Allergy UK has estimated that half the UK population will suffer from an allergy by 2015.

Therapeutics is a new comprehensive, all-natural yet scientifically based skin and body care range created by leading dermatologist John Hamilton. In place of chemical irritants, the Therapeutics formulas comprise 100% botanical plant ingredients, essential and vital oils made up of vitamins, proteins and minerals that feed your skin cells, which in turn make them stronger and healthier.

Products include a range targeting acne & spots, one for eczema, psoriasis and dermatitis, and one for rosacea. Prices start at £7.99 for handwash and rise to £20.99 for moisturising cream (200ml).
